

## MMT Product Overview

### MMT-200FC

The MMT-200FC is a proven solution for retail unattended point of sale applications. Full cash and card acceptance and full cash payment means that this unit will sit alongside or replace traditional POS equipment to compliment an existing counter based service.

The design meets DDA requirements and has proven long term reliability.

### MMT-200NC

The MMT-200NC is based upon the proven FC model. Full cash acceptance means that this unit can be used for payment applications where change giving is not required.

A Perspex protector means that graphics are safe from tampering and also makes it simple to add spot graphics for promotions.

The design meets DDA requirements and has proven long term reliability.

### MMT-200TV

The MMT-200TV adds ticket vending to the MMT range. A ticket printer is fitted with the capability to handle fan fold ticket stock. Payment or booking recognition can be made using a chip and pin device, and the front door makes the collection of multiple tickets both easy and reliable. Stereo audio is fitted to enable the host software to give audible menu guidance.

### MMT-200CLC

The MMT-200CLC offers a complete contactless card handling unit. Whether it forms part of an existing system or is stand alone, the extensive functionality enables many aspects of contactless technology to be exploited.

The unit offers cash acceptance and dispensing. Payment may also be taken by credit/debit card.

The card may be dispensed, accepted and also captured internally, thus making the unit suitable for payment and redemption applications. Stereo audio is also available for menu guidance.

### MMT-200CC

The MMT-200CC offers a complete contact card handling unit. Whether it forms part of an existing system or is stand alone, the extensive functionality enables many aspects of contact technology to be exploited.

The unit offers cash acceptance and dispensing. Payment may also be taken by credit/debit card.

The card may be dispensed, accepted and also captured internally, thus making the unit suitable for payment and redemption applications. Stereo audio is also available for menu guidance.

### MMT-200RC

The MMT-200RC adds an extra level of convenience to retail unattended point of sale applications. Full cash and card acceptance and full cash payment means that this unit will sit alongside or replace traditional POS equipment to compliment an existing counter based service.

The addition of coin recycling means that this is one of easiest units to operate by eliminating cash reconciliation and re-filling time.

The design meets DDA requirements.
